

# Water & Wastewater Measurement Experts

We Keep Your *Water* Projects Flowing

## The VersaLine Range Specializing in both Monitoring and Control

Waste Water and Water Level Sensors Designed for Municipalities

Municipalities worldwide rely on PMC's sensors to provide maintenance-free, long-term monitoring of all applications including:

- Ground Water
- Sewers
- Drinking Water
- Recycled Water
- Surface Water
- Water Conservation
- Rivers/Lakes/Streams
- Flooding
- Storm Water
- Reservoirs
- Saltwater
- Purification

MINIATURE BORE HOLES

WASTEWATER

SURFACE WATER

GROUND/SEA WATER

## The PMC Advantage...

### Delivery

24-Hour Emergency delivery available with any Full-Scale Range & cable length specified at the time of ordering

### Zero Maintenance

When using our MP 11 Moisture Protection Reference Volume

### High Reliability

12-year MTBF! (Mean Time Between Failure)  
Fully-Potted and Molded Cable

### Titanium Construction

With a 5-year Corrosion Warranty

### Accuracy

±0.1% of Full Scale

**Any Full-Scale Range can be specified**  
From 10" of water to 5000 psi (water injection)

**Miniature Configuration**

Standards of 1" and 3/4" Diameter with 3/8" where space is at a premium
