Product overview and applications

The ATM/N 19 series 94 is part of a comprehensive range of pressure transmitters specifically designed for the long term monitoring of ground water and waste water. The series 94 is available with the most commonly used voltage outputs including 0 to 5 VDC and 0.5 to 4.5 VDC. Features such as Kevlar strengthened cable, titanium, ballast weights and data loggers broaden the installation opportunities. The modular design permits fast delivery for all pressure ranges and standard options.

Examples of applications include:

- Deep wells, lakes, dams and reservoirs
- Bore holes
- Surface water, irrigation canals and rivers
- Tank level measurement
