

- Low Cost, Linear 1:1 Repeater
- $\pm 1''$ WC Accuracy
- Ranges 10''WC to 100 psi
- Anti-Clogging, Corrosion Resistant
- Double-Ring Design for improved stability

The PMC Pneumatic Tank Level - Pressure Transmitters (LT Series) has been designed specifically for measuring tank levels in paper mills and similar process industries where pulp or other viscous materials are stored. The small, 1½" diameter of the transmitter permits installation to be flush with the inside wall of pipes over 3" in diameter. This flush fitting eliminates the usual pocketing problems encountered with conventional flange mounted level transmitters. The Double Ring design includes a second ring that locks the diaphragm retainer ring at the point of calibration and helps to ensure long term accuracy.

The PMC Miniature Pneumatic Pressure Transmitters (PT Series) offer similar performance with packaging specifically designed to measure pressures in paper mills and similar process industries where plugging of gauges and seals is a particular concern. Please refer to the appropriate data sheet for more information.

Electronic Versions Also Available

STANDARD SPECIFICATIONS

■ Full Scale Ranges (Zero Based)

300"WC is standard and well suited to most applications. Other ranges from 10"WC to 100 psig also available.

Consult factory for other variations.

■ Accuracy

± 1" WC over Full Range

■ Overpressure

Up to 200 psig or Full Vacuum

■ Operating Temperature Range

200°F Standard, 400°F available

■ Construction

All Stainless Steel Construction, 316L for wetted parts

■ Air Consumption

2.5 Standard Cubic Feet per Hour (0.07 Nm³/hr)

■ Installation

Stub 316L SS Weld-On Nipple furnished with each transmitter, Threaded Nipples also available for LT Series.

PMC adopts a continuous development program which sometimes necessitates specification changes without notice.

ORDERING INFORMATION

LT Series Pneumatic Tank Level Pressure Transmitters

When ordering please specify the following:

MODEL PMC	
LT/DR	SS Weld-On Nipple
LT/SAN	SS Sanitary Weld-On Nipple
Range	Specify psi, " WC, bar, absolute, gauge, etc.
O-Ring	
N	Buna N 200°F
Si	Silicone 400°F
V	Viton 400°F
EPR	Ethylene Propylene 400°F
Diaphragm	
Hc	Hastelloy C
Ta	Tantalum
Temperature	
S	200°F
HT	400°F

(1) (2) (3) (4) (5)
Select Specify Select Select Select

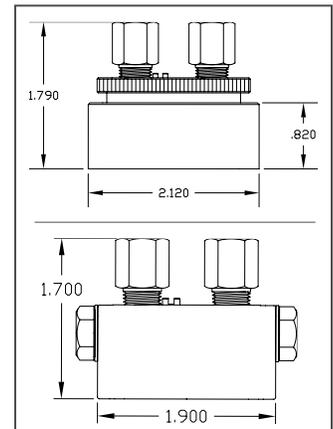

Order Code Example: PMC-LT/DR-300"WC-N-Hc-S

- (1) Model: PMC-LT Tank Level Transmitter
- (2) Range: 300" WC
- (3) O-Ring Material: Buna N
- (4) Diaphragm Material: Havar
- (5) Temperature: Up to 400°F

OPTIONS

PMC offers a range of options, accessories, and variants for Tank Level - Pressure Transmitters (LT & LT/SAN) Series including the temperature and material options listed above, Stainless Steel adapters, and Calibration-Matched Pairs of Transmitters.

Contact PMC for other options and accessories
